

NortonLifeLock

NortonLifeLock users may experience this warning when attempting to register for an event or give online. The reason for this is stated in their message – it’s because our registration and giving site is new.

You can know that it’s ok if:

- it is a secure site – which can be seen if the url starts with https:// ❶
- it is our site – my.village.bible ❷

If these two things are true (which is most likely), you can just click on the “Continue to Site” link at the bottom right of the screen. ❸

NortonLifeLock Safe Web

Scam Insight: Personal Information Risk
<https://my.village.bible/OnlineReg/CompleteRegistration>

This site is safe, but...

It asks for personal information and is not well established with the Norton Community. Use caution when entering any of your information on this site. Visit [Norton](#) to learn more about personal information risk on Websites.

Age: New
This website has been available for a short time.

Prevalence: Few Users
Very few Norton community members have used this site.
